Tax Savings For Exporters

2006

U.S. Exporters > Enjoy Enhanced Tax Benefits !

If you paid a 35% tax on your Export Profits in 2005, you did not have an IC-DISC as part of your structure.

One client, who did not activate their IC-DISC until September of 2005, sent in their computations for our free review. On about \$ 30 million in exports they are expecting to **save approximately \$250,000** in Federal taxes. Their alternative, using ETI benefits, would be about \$134,000 for 2005 (or \$100,000 if realized in 2006).

In essence, the Tax Rate **reduction** of an IC-DISC is far more valuable than an ETI **deduction** at 35%.

For a free estimate, with no obligation involved, of potential tax savings related to

your situation please contact us, or have your financial advisor contact us as soon as possible.

This is not an end of the year planning tool, since the IC-DISC may only be used for shipments made on or after the date of formation.

Please visit our web site for additional information, including e-mail and Print

**application forms Formations in 24 hours.
